To whomsoever it may concern,

I am pleased to recommend Ms. Garima Mehta for the Master's program at your university. I have had numerous opportunities to observe, and interact with Garima since she joined Verizon. She has always impressed me with her innovative and practical way of working on the projects.

Garima has shown herself to be a diligent young engineer, one who is able to take hold of new concepts very quickly. Her most remarkable quality is the dedication she shows in her work. She is a team player with a high degree of motivation to accomplish her goals. Garima strikes to me as an enthusiast always eager to learn new things and to keep-up with the ever-changing technology. Her originality, independent thinking, curiosity and urge to learn new things made her gain a lot of recognition in the organization. She picked up skills in new technology domains such as Software Defined Networks (SDN) and Artificial Intelligence, very fast. With her quick and methodical way of doing things, she even received two spotlight awards within a year of joining Verizon. I can say that by asset of her technical familiarity and communication skills, she handles the tasks assigned to her very professionally.

Taking in consideration her determination, analytical and programming skills, and zeal to learn, I am sure that she will do an excellent job in her Master's course. Her performance as a professional and as an excellent human being prompts me to strongly recommend her for admission to the MS program at your University. I wish her all the best for her future endeavors.

Thanking you,
